SUMMARY

I am a resourceful software developer, detail-oriented individual, results-oriented full-stack developer with over 2+ years of experience building intuitive, responsive, robust and scalable web solutions. I possess a holistic understanding of the web development landscape with a keen focus on enhancing user experiences. I have a proven track record of enhancing team performance and cultivating collaborative environment within teams. My continued experience using web technologies such as html, css, javascript, php, laravel, reactjs, bootstrap,tailwindcss, nodejs, postman, agile, scrum,git, github, docker, jira, phpunit has also helped to horned my strong analytical, organizational and problem-solving skills as well as the ability adapt to changing environments and quickly grasp new technologies. My commitment to continuous learning and my dedication to staying current with industry trends make me a promising team addition.

SKILLS

Html and css, Javascript, php, Laravel, reactjs, nodejs, nextjs, bootstrap, Rest API, OpenAPI, GraphQL, versioning tools (git, github), CI/CD tools and Containerization (Docker and Kubernates), Cloud (Azure, AWS) SDLC and project management tools (agile, scrum), problem solving, critical thinking, effective time management, software testing, database and database management (mysql and mongodb, postgresql,)

PROFESSIONAL EXPERIENCE

MARCH 2024 – PRESENT

FULL-STACK DEVELOPER, Toks-Net Digital

I am responsible for developing and maintain high quality Saas applications such as analytical software solutions, E-learning and ERP solutions, centralized crypto exchange and modernizing legacy applications to meet the evolving needs of users and stakeholders.

- Continuous Collaboration with a cross-functional team to develop an analytical software solution for data analysis and visualization, leveraging full-stack development skills.

- Playing a pivotal role in the migration of a legacy hospital management application to a modern platform, ensuring seamless transition and enhanced functionality.

- Designing and implementing features for the analytical software, focusing on intuitive user interfaces and efficient data processing algorithms.

- Installed applications for offline use on client servers, optimizing performance and accessibility for users in remote or low-connectivity environments.

- Successfully deployed code online on cPanel servers, Linux servers for offline or local applications ensuring smooth integration and accessibility for end- users.

November 2024 – March 2024

FULL-STACK DEVELOPER, Timz web

Led the development of an MVP for a niche e-commerce platform, focusing on both frontend and backend development.

Frontend Development:

- Designed and implemented responsive UI using React.js.
- Developed reusable React components and managed state with Jira.

Backend Development:

- Developed RESTful APIs using Node.js and Laravel php.
- Managed MySQL database, ensuring data integrity and performance.
- Implemented Laravel Breeze authentication and authorization

APR 2023 – OCT 2023

BACKEND DEVELOPER, FTV (contract)

- Collaborated with the client and frontend developers to design and develop a comprehensive inventory management system using laravel and MySQL.

- Implemented backend functionalities, including inventory tracking, product categorization, and order processing, ensuring accurate and efficient inventory management for the client's business.

- Integrated secure user authentication and authorization mechanisms to safeguard sensitive inventory data and restrict access based on user roles.

- Worked closely with frontend developers to integrate dynamic user interfaces, enabling seamless user interactions and enhancing overall user experience.

- Provided ongoing technical support, resolved bugs, and implemented feature enhancements based on client feedback, ensuring the system met the client's evolving business needs.

JUL 2022 – JAN 2023

E-COMMERCE BACKEND DEVELOPER, HOT9JASHOPPERS

- Developed core backend features for a laravel-based e-commerce website, including product management, secure payment gateway integration and order fulfillment processes.

- Collaborated with frontend developers to implement responsive and user-friendly interfaces, ensuring seamless navigation and optimal customer experience.

- Enhanced website security by implementing robust authentication protocols and data encryption methods, safeguarding customer information and transactions.

- Conducted performance optimization techniques, including caching and database indexing, to improve website speed and responsiveness, leading to increased user satisfaction.

- Assisted in bug resolution and provided technical support to ensure uninterrupted website operations, contributing to high customer retention rates and improved sales

EDUCATION

2016 - 2021

Bachelor of Education in Biology · University of Benin · Benin City, Edo State.
